

Achievements

The department provides therapeutic and surgical services for all patients suffering from ear nose and throat diseases.

And to raise the level of the medical services provided, the department uses varied surgical techniques. Such techniques include the following:

- Endoscopy
- Microscopic surgery
- Plastic surgery (rhinoplasty and ear deformities)
- Maxillofacial repair surgery
- Head and neck surgery (eradication of laryngeal tumors, snoring treatment, nasal blockage of the pharynx).

In addition, the department launched two specialized units to increase the levels of the medical services provided:

- Audio unit
- Phoniatrics Clinic
